www.acm.org

The **ACM Special Interest Group on Algorithms and Computation Theory (SIGACT)** specializes in the theoretical foundations of computer science. SIGACT members are interested in diverse topics such as algorithms, complexity theory, parallel computation, VLSI, cryptography, machine learning, computational geometry, number theory, and distributed computation. The membership is unified by their mathematical, rigorous approach to modeling and solving computational problems. The quarterly newsletter ACM SIGACT News publishes research results as well as news of interest to the community. The SIG sponsors or co-sponsors several symposia and conferences.

The **Association for Computing Machinery (ACM)** is an educational and scientific computing society which works to advance computing as a science and a profession. Benefits include subscriptions to *Communications of the ACM*, *MemberNet*, *TechNews* and *CareerNews*, full and unlimited access to online courses and books, discounts on conferences and the option to subscribe to the ACM Digital Library.
