About the *ACM Queue*

Queue is the ACM's magazine for practicing software engineers. Written by engineers for engineers, *Queue* focuses on the technical problems and challenges that loom ahead, helping readers to sharpen their own thinking and pursue innovative solutions. *Queue* does not focus on either industry news or the latest "solutions." Rather, *Queue* takes a critical look at current and emerging technologies, highlighting problems that are likely to arise and posing questions and soliciting solutions from fellow software engineers.

Queue is now published 6 times per year, with issues available for download via Google Play and the Apple App Store. Also available as a desktop digital edition.

About TechNews

TechNews is ACM's e-newsletter/news briefing service distributed Monday, Wednesday, and Friday to a circulation of 100,000 subscribers. *TechNews* is an email digest of computing & technology news gathered from leading sources; concise summaries that are perfect for busy professionals who need and want to keep up with the latest industry developments.

TechNews is regularly cited as one of ACM's most valued benefits and is one of the best ways to communicate with ACM members.
