SIGACT

Name and Mission:

SIGACT: SIGACT Algorithms & Computation Theory

The primary mission of ACM SIGACT (Association for Computing Machinery Special Interest Group on Algorithms and Computation Theory) is to foster and promote the discovery and dissemination of high quality research in the domain of theoretical computer science. The field of theoretical computer science is interpreted broadly so as to include algorithms, data structures, complexity theory, distributed computation, parallel computation, VLSI, machine learning, computational biology, computational geometry, information theory, cryptography, quantum computation, computational number theory and algebra, program semantics and verification, automata theory, and the study of randomness. Work in this field is often distinguished by its emphasis on mathematical technique and rigor.

| Danny Lewin Best Student Paper       | Awarded at the STOC Conference from student papers submitted to conf. $500 and no travel $ (renamed 2002) |
| 2013 Siu On Chan  Aaron Bernstein    |                                                                             |

| SIGACT/SIGOPS Edsger W. Dijkstra Prize in Distributed Computing | Given alternately at ACM PODC or EATCS DISC to an outstanding paper on the principles of distributed computing, whose significance and impact on the theory and/or practice of distributed computing has been evident for at least a decade. The winning authors will share a cash award of $2,000, and each will be presented with a plaque at the business meeting. |
| 2013 Nathan Linial                    |                                                                             |
