ACM-NDC Study of Non-Doctoral Granting Departments in Computing

What is NDC?
➤ The first-ever ACM-sponsored national survey of non-Ph.D. granting 4-year institutions in Computer Science, Computer Engineering, Information Systems, Information Technology, and Software Engineering
➤ Adapted from annual Taulbee Survey of Ph.D.-granting institutions conducted by the Computing Research Association (CRA) and SIGCSE-sponsored TauRUs surveys

Why your program should participate
➤ Get represented in NDC's data on enrollment, degree production, student body composition, and faculty salaries/demographics
➤ Be entered to win one of 5 unrestricted $2,500 grants for your department’s discretionary fund
➤ Get results before the rest of the community

You qualify if you...
➤ Offer bachelor and/or master-level degrees in at least one of CE, CS, IS, IT or SE, but do not offer Ph.D./doctoral degrees in any computing area
➤ Are in a not-for-profit academic institution in the United States

How do I participate?
➤ If you meet the criteria outlined above and have not received an email with a survey link from ACM, please email learning@hq.acm.org with ACM-NDC Study in the subject line.
➤ If you have received a link but have not yet filled out the survey, please do so no later than Sunday, March 24! And encourage your qualifying colleagues to do the same!
