## RESPONSE TO REQUEST FOR INITIAL PUBLIC INPUT ON G7 HIROSHIMA AI PROCESS BY THE US DEPARTMENTS OF COMMERCE AND STATE<sup>1</sup>

The Association for Computing Machinery (ACM) is the longest-established and — with more than 50,000 American members — the largest association of individual professionals engaged in all aspects of computing in the nation. A non-profit, non-lobbying, and otherwise wholly apolitical organization, ACM’s mission includes providing unbiased, expert technical advice to policymakers on matters of our members’ wide-ranging expertise. That work is accomplished in the United States by and through ACM’s U.S. Technology Policy Committee (USTPC).

USTPC broadly commends its sector-leading Code of Ethics and Professional Conduct<sup>2</sup> and the following specific recent policy products concerning artificial intelligence to the Departments of Commerce and State (the Departments) for their consideration in connection with this inquiry (all of which are available electronically at the URLs here provided):

USTPC stands ready to assist the Departments with further technical and other analyses. Please contact its Technology Policy Office below for additional information or to arrange a briefing with one or more of USTPC’s and ACM’s expert members.
