3) A brief description of your chapter and school including number of chapter members

The ABES-EC Student Chapter of the ACM was established in 2014 to address the needs of the ABES-EC computing community by IT Department. Goal of the chapter is to create interest among the students for computer science apart from what they learn during the course work. The chapter organizes talks and workshops on different subjects by speakers who are well known in their area. These talks give students opportunities to learn about advanced research subjects. Apart from these, some non-technical activities are also organized.
