The **ACM Special Interest Group on Programming Languages (SIGPLAN)** explores programming language concepts and tools, focusing on design, implementation, and efficient use. Its members are programming language users, developers, theoreticians, researchers, and educators. The monthly newsletter, *ACM SIGPLAN Notices*, publishes several conference proceedings issues, regular columns and technical correspondence (available in electronic or hardcopy versions). Members also receive a CD containing the prior year conference proceedings and newsletter issues. SIGPLAN sponsors several annual conferences including OOPSLA, PLDI, POPL and ICFP, plus a number of other conferences and workshops.

The **Association for Computing Machinery (ACM)** is an educational and scientific computing society which works to advance computing as a science and a profession. Benefits include subscriptions to *Communications of the ACM*, *MemberNet*, *TechNews* and *CareerNews*, full and unlimited access to online courses and books, discounts on conferences and the option to subscribe to the ACM Digital Library.
