# WOW

- **Sigmatrics is about:** *Measurement, Modeling, and Performance Evaluation of Computer/Communication Systems.*
- Two items that Sigmetrics is proud of:
  - **Achievement Award (2013):** Given to Prof. J. Walrand, UC Berkeley. Prof. Walrand has never published a regular paper in SIGMETRICS, yet the award is given purely based on his scholarly achievements and impact to our community. This show the “*inclusiveness*” of Sigmetrics
  - **Launching a new Journal:** ACM Trans. on Modeling and Performance Evaluation of Computing Systems (*after 8 years of application*). This transaction will be “inclusive” to many communities

# “OW”

- Despite our efforts, there is no significant increase in Sigmetrics’ membership
- Some of the effort used include:
  - Invite companies to speak to students who attend Sigmetrics conferences
  - Tremendous effort to lower students’ registration fee
  - “Registration Credit” for previous students who attended Sigmetrics
- New effort:
  - Reach out to students in Europe/China/India
